It is not the child who is born in the private darkness of fallopian tube after love making, not in the glory of "Petri Dish" of IVF.

A child must born in the private darkness of fallopian tube after love making, not in the glory of "Petri Dish" of IVF

lab.

What are the ethical issues surrounding the use of embryos in research? How do you think these issues should be addressed? Do you think there should be any restrictions on the use of embryos in research? Why or why not?

Embryos are the earliest stage of human development, and they have the potential to become a child. This is why the use of embryos in research is a controversial issue. Some people believe that embryos should be treated as human beings, while others believe that they are just cells. The ethical issues surrounding the use of embryos in research are complex and multifaceted.

"The involvement of third person in the reproduction is totally unacceptable whether this take in the form of a sperm, an ovum, an embryo or a uterus".

如何說說人話

如何說說人話，這是一個老問題了。有人說，人話就是「客氣話」，有人說，人話就是「人情話」。其實，人話就是「人話」。在社會交往中，我們需要學會如何與人溝通，如何與人交往。這不僅僅是語言的表達，更是心與心的交流。只有學會了如何說說人話，我們才能在複雜的社會關係中游刃有餘。

說人話，首先要學會傾聽。傾聽不僅是聽聲音，更是聽對方的心聲。當對方在說話時，我們應該專注地聽，不要心不在焉。其次，要學會尊重他人。每个人都有他的尊嚴和底線，我們在說話時要注意分寸，不要隨意打斷別人，更不要指責別人。最後，要學會誠實。誠實是立身之本，也是說人話的基礎。只有誠實地表達自己的想法和感受，才能贏得他人的信任和尊重。

如何說說人話，這是一個老問題了。
